AIR PURIFIER

*Air the way
it was meant to be!*

*Ultraviolet Germicidal
and Photo-Catalytic
Air Purifiers for
Heating and Air
Conditioning Systems*

Second Wind Air Filter/Purifier Model 9000

- Whole house air filtration and air purification
- Filter particles from your indoor air
- Remove mold, viruses and bacteria
- Remove fumes and odors
- Improves performance of your heating/cooling equipment
- Registered as a Class II medical device
- Registered with the EPA
- Available in a smaller version (9016).

The series 9000 air purifiers will address all three of the indoor air pollutants classified by the World Health Organization. Using filtration, physical particles in the indoor air stream are reduced. Ultraviolet Germicidal light aides in the removal of biological agents (viruses, bacteria and mold). While a patented process of Photo-catalytic oxidation removes amounts of chemical agents (odors and fumes). Also, keeps the heating/cooling equipment clean, extending equipment life, lowering utility costs and allowing the system to be more efficient.

“Indoor air pollutants can be classified in different ways. One approach is to divide them into chemical, physical and biological agents.”

World Health Organization

“If you or someone you know have allergic symptoms or asthma, you are sensitive to “triggers,” including particles in the air, Some common triggers : molds, dust mites, odors and fumes, viruses”

American Lung Association

“Eliminating mold throughout the home can help control asthma attacks”

Center For Disease Control

“...exposure to mold can cause a variety of health effects and symptoms, including allergic reactions.”

Environmental Protection Agency

Second Wind Air Purifier Model 2000

- Whole house air purification and disinfection
- Remove mold, viruses and bacteria
- Remove fumes and odors
- Improves performance of your heating/cooling equipment.
- Registered as a Class II medical device
- Registered with the EPA
- Available in 120-277vac single lamp (2018) versions for smaller applications.

In the 2000 series Ultraviolet Germicidal light aides in the removal of biological agents (viruses, bacteria and mold). While a patented process of Photo-catalytic oxidation removes the amount of chemical agents (odors and fumes) in the indoor air stream.
